Our Solutions

Lenok Infotech offers IT support packages that you can choose the level that's right for you, and also add whichever specific extra services you might need. We can help provide assistance to your current in-house IT department, or take over the full day-to-day IT operations. Just let us know what you need and we'll handle it.

Server and storage Systems

we are never restricted to any specific hardware or software, thanks to our diverse team of IT engineers which carry certification from all major IT companies. It means that all you have to do is chose the hardware you want and make a choice about the OS (Operating System) you want to get seeded in your file server. Lenok InfoTech team will make sure that a server according to your demands is provided. We can install your file servers with any of the major OS of your choice like Windows Linux Mac OS

Structured Cabling for Voice ,Data and Video Systems

Structured cabling is an organized approach to a cabling infrastructure. To fully understand this concept, it is easiest to look at what structured cabling isn't. In many data centers the cabling methodology used is defined as "point to point". This is running patch cables (or "jumpers") directly to and from the hardware that needs connectivity.

Data backup and Recovery solutions

The different type of data backup according to the customer's Infrastructure and requirements .We are experienced in all type of back systems including DR solutions with the major backup solutions like Symantec ,Acronis ,Veem , Arc etc. Data recovery is the major role in Information Systems, We Lenok Infotech a leading provider of data recovery services, data restore, data backup, data retrieve for corporations, individuals.
